FR9-99-Q018 PATENT

IN THE SPECIFICATION

Please replace the paragraph beginning at line 3, page 10 with the following rewritten paragraph:

Instead of us	sing a single default router to transmit data over the IP network 22, a
technique described	in U.S. Patent Application Serial No. 09/523,056, filed March 10,
2000, [[[IBM Docket No. FR9-99-008]]] which is hereby incorporated
by reference herein,	is used. In this new technique, a host uses a new layer between the
IP layer and the network layer, this additional network layer is operable to select one	
router from a set of candidate routers, such as the routers 26 or 28, by running an	
algorithm based upon parameters defined in the data packet which is transmitted.
